

1 NON-DISRUPTIVE COMPUTER-CONTROLLED IN-LINE CONVEYOR FLOW
2 WEIGHT CALIBRATION SCALE

3
4 ABSTRACT

5
6 Disclosed is a weighing system that is capable of
7 continually sensing load against a conveyor and a
8 calibration system for the weighing system that is capable
9 of applying a reference load to the weighing system without
10 interrupting the ability of the weighing system to sense
11 load against the conveyor.
